 Greg Clausen, P. Eng. General Manager of Infrastructure	 Mark Mieto Chief Administrative Officer

Report Prepared By	Division Review
 Scott Ward Quality Compliance Officer	 Nick Benkovich Director, Water & Wastewater Services
	 A.W. Cook

Attached is the *2007 Water Works Summary Report* for Council's information. The Safe Drinking Water Act requires that by March 31st of the following year that a summary report be given to Council which, for each of the systems operated, must:

- List the requirements of any Act, regulation, system approval, or Order that the system failed to meet at any time during the period covered by the report;
- The duration of any such failure; and
- For each failure, provide a description of the corrective action taken.

The summary report must also include the following information for the purpose of enabling Council to assess the capabilities of each system in meeting existing and planned usages. Specifically:

- A summary of the quantities and flow rates of the water supplied during the period covered by the report, including monthly averages, maximum daily flows, and daily instantaneous peak flow rates; and
- A comparison of the summary of the above flows to the rated capacity and flow rates approved in the system approval.
