BACKGROUND

In September 2004, City Council identified the Healthy Community Initiative as one of their top 4 priorities for their term of council. Two objectives were cited; recognizing and encouraging the multitude of healthy community initiatives being undertaken by the community over the past 20 years and creating a strategy to provide direction to priorities within the healthy community movement for the purpose of improving health indicators overall. By example;

Current Health Situation

Relative to the Province of Ontario the northeast has a higher

- unemployment and low income rate
- percentage of daily smokers
- percentage of adults who are current drinkers
- percentage of adults who are overweight or obese
- prevalence of self-reported activity limitations, arthritis/rheumatism, high blood pressure, diabetes and heart disease

* Population Health Profile: North East LHIN

The Healthy Community Initiative is a process of community change, mobilization and transformation. There are incremental steps required to achieve such fundamental change. Since council identified the priority, clear and deliberate action has been taken to move this community to a healthier state of living. This requires community participation and recognition, community leadership and political endorsement. Without any of these factors the initiative will not reach the potential it requires to see significant impact on community and individual health. The Healthy Community Movement is not about an individual project; it is about collaborative action, pride and confidence.

FOLLOW UP TO MAY 24TH, 2006 AGENDA REPORT

The report dated May 17, 2006 was for council information only. It was not fully accurate in its "statement" of \$36,000 for the breakfast recognition. The \$36,000 was an estimate at the time for both the breakfast recognition and promotion/publications as clarified above. More details have been received on the cost of the promotion, publication and launch.
